

EcoAct is an international advisory consultancy and project developer that partners with businesses, organisations and governments to offer the widest range of best in class solutions to effectively tackle the challenges of climate change.

The company has more than 12 years experience developing and implementing climate and carbon strategies and solutions at an international level. EcoAct helps executives to transform their business models and make climate action a driver of performance.

To define and deliver climate and carbon strategies that are integrated throughout organisations' value chains, EcoAct combines three areas of expertise:

Strategic consulting: climate scenario analysis and risk & opportunity identification, materiality assessment, stakeholder engagement and target setting.

Data management, measurement and systems: compliance with regulation, reporting, energy management and efficiencies, renewable energy strategies and products.

Project design and management: change management, adaptation, carbon offsetting, development of field projects, carbon pricing, communications support and SDG analysis.

Company history

EcoAct was founded in France in 2006 by Thierry Fornas and Gerald Malden.

In February 2017, the company joined forces with Alliantis, a leading organisation in strategic alliance consulting and CSR communication.

In July 2017, it acquired Carbon Clear, a major British consulting company in the fields of energy, climate change and sustainable development, to form the EcoAct Group.

In 2018 the partner companies consolidated their merger and re-branded under under the singular name of EcoAct.
